

# XT40

## THE PERFECT BALANCE BETWEEN TECHNOLOGY, RELIABILITY, AND AESTHETICS

---

Several years of experience in rental karts led the Parolin technical department to build a kart capable to meet different customers' needs. The XT40 Line is the result of a long period of research and development, which is concretized nowadays in the XT40 Smart and XT40 Elite variants. Enjoyable to drive thanks to its comfort and lightness, the XT40 line presents a wide possibility of drive adjustment and an extreme ease of maintenance for the track owner. Another remarkable feature of the XT40 is robustness, essential on current rental karts, but without compromising its good looking and aerodynamic aesthetics. Totally built inside Parolin facilities with fine raw materials and ultimate technologies, this product represents the apex of the Company's rental range.

## CHASSIS

<b>Tube Diameter</b>	40x2 mm Steel
<b>Axle</b>	40x5 hollow
<b>Bearings</b>	2
<b>Wheelbase</b>	1060 & 1080 mm
<b>Brake System</b>	hydraulic self adjusting billet
<b>Brake Disc</b>	Magnetic Steel
<b>Stub Axels</b>	Billet removable pin20 mm
<b>Steering Wheel</b>	320 mm
<b>Wheels</b>	Alloy 180x125 mm

## OPTIONAL
